

Diesel Engine Fire Pump Emergency Solenoids Type HJES12v and HJES24v

revision 1.0

Technical Datasheet

These emergency starter solenoids (or battery contactors) for fire pump diesel engines, start the diesel engine powering the fire pump that supplies water to the fire protection systems in a fire situation when the electronic start fails, as required in Factory Mutual (FM) compliant installations. This device is UL Listed.

The emergency starter solenoids have a housing with a tough zinc finish and sealing to prevent corrosion, and are available in 12 and 24 VDC models, rated for 400 amps rolling current and 800 amps breakaway current.

Equivalent to Metron 1804A and Hubbell HC1804A.
