

Technical Datasheet

This controller is designed to meet and exceed the requirements of NFPA 20 and is UL listed to 508 for controlling one electric motor driven jockey pump via direct on line starting.

The Jockey pump controller is relay based and supplied with an adjustable pressure switch mounted on the side of the enclosure.

The enclosure is small and compact (400x300x160) and rated to IP54, finished in RAL7035

Door mounted equipment;

- Mode switch; Manual, off , Auto
- White indicator, Power on
- Red indicator, Tripped
- Green indicator, Running
- Door interlocked isolator

Volt free contacts

- Motor running
- Motor tripped
- Power on

Internal Equipment

- Adjustable minimum run timer
- Control transformer
- Circuit protection fuses
- Motor protector and overload, adjustable

Model number: H350u- kW rating- Voltage
